

MidiPCB HF RFID Antenna

Art. no.:
22000086

- Slim Design
- Up to 200mm read range

MidiPCB HF RFID Antenna

The metraTec PCB Antenna Family includes a range of printed circuit board antennas for 13.56 MHz (HF RFID). With the MidiPCB (150 x 152 mm) you can realize a variety of applications such as scanning at the point of sale or checkout management. With the right reader – eg. metraTec’s QuasarMX – and tag, you can expect a read range of up to 200 mm.

If you need other dimensions, we offer an antenna design service for PCB antennas, as well. For a fixed price, we design an antenna in any shape from 5 x 5 mm to 50 x 50 mm and with any connector you like.

If required, we can also produce flexible versions of our PCB antennas. These can be integrated into even the smallest volumes and are often easier to mount.

MidiPCB HF RFID Antenna

Art. no.:
22000086

Technical Specification

Operating Principle	HF RFID Loop Antenna
Operating Frequency	13.56 MHz (worldwide)
Read Range	up to 200 mm
Antenna Connector	BNC
Impedance	50 Ohm
Temperature Range	-40 Â°C to +85 Â°C
Dimensions	150 x 152 mm (plus BNC connector)

About Metratec

Metratec develops, produces and sells Radio electronics for the areas of "Identification", "Localization", and "Communication" and thus serves a variety of markets with standard products as well special solutions. Customers include OEM customers, system integrators and research facilities worldwide.
